PROFESSIONAL SUMMARY

Senior engineering leader with 18+ years of experience building and scaling distributed platforms at global enterprises. As an L7 Senior Software Development Manager at AWS, serve as a manager of managers leading a 35+ engineer multi-team organization spanning platform engineering, AI systems, global commerce, and data governance — delivering systems across 700M+ devices, 10B+ data records, and 200K+ TPS. Track record of converting platform and compliance investments into business outcomes: +25% revenue conversion, 60% lower regulatory exposure, 30% developer productivity gains. Partner with VP-level leadership on long-term technology strategy across 20+ countries. Known for growing engineering leaders (6 promotions from L5 to L6) and building high-performing remote-first teams.

CORE COMPETENCIES

- **Engineering leadership:** multi-team org design, talent development, executive communication, remote-first culture
- **Platform engineering:** builder service templates, shared services, GraphQL Supergraph federation, micro-frontend architecture, 200K+ TPS distributed systems
- **AI & intelligent systems:** LLM integration, AI agents, RAG pipelines, vector search, model routing, guardrails, human-in-the-loop workflows
- **Regulated systems & compliance:** GDPR, CCPA, COPPA enforcement, auditability at 10B+ record scale, encryption standards, policy governance
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, Redshift), Kubernetes, Docker, CloudFormation, CI/CD automation

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) | *Senior Software Development Manager*

2019 – Present | Denver, CO

- **Org leadership:** Lead a 35+ engineer organization across Platform, AI, Commerce, and Data Governance teams within AWS Training & Certification as a manager of managers — direct reports include the managers owning commerce platform integrations & billing, and identity (email verification, user invitations, SAML IdP/IdC integrations).
- **Budget ownership:** Own \$10M+ annual headcount budget covering 35+ engineers; responsible for hiring plan, capacity planning, and cost governance.
- **Global commerce at scale:** Own engineering for systems supporting 1.8M+ managed AWS accounts and 1M+ annual lab sessions; modernized global commerce across 20+ countries — reduced checkout steps from 18 to 6 and increased conversion by 25%.
- **Data governance & privacy:** Architected on-device data governance platform deployed across 700M+ Amazon devices with policy enforcement and encryption controls; established auditability

across 10B+ processed records — reduced regulatory exposure by 60% with full GDPR/CCPA/COPPA compliance.

- **Privacy engineering:** Led data deletion orchestration initiatives; invented deletion key enrichment techniques now adopted Amazon-wide.
- **AI platforms:** Launched LLM-powered knowledge platforms and AI agents (RAG, vector search, model routing, guardrails), increasing developer productivity by 30%; personalized enterprise learning pathways for 10M+ users via AI-driven Skills Accelerator.
- **AI teammate (2026):** Now launching Team Skills Acceleration — an AI teammate that converts business goals into training plans, baselines user proficiency, tracks training progress, and gives org leaders readiness signals on when teams are prepared to execute business plans.
- **Platform engineering:** Established platform engineering practice — builder service templates, GraphQL Supergraph federation, micro-frontend architecture, standardized CI/CD — accelerating feature delivery and enabling independent deployments across product teams.
- **Strategic influence:** Partner with VP and executive leadership to define long-term technology investments in AI and cloud; defined distributed architecture sustaining 200K+ TPS with strong resiliency, observability, and cost governance.
- **Talent development:** Built leadership bench across a globally distributed remote team: 6 engineers promoted from L5 to L6; increased team retention by 30%.

DISH Network | *Senior Enterprise Architect*

2017 – 2019 | Denver, CO

- Defined architectural modernization strategy for customer management and order processing systems serving millions of subscribers; improved throughput by 35% and reduced downtime by 50%.
- Led 30-engineer cross-functional integration of CSG, Recurly, and Amdocs billing systems; directed enterprise microservices transformation — deployment cycles down 45%, API response times improved 25%, operational costs reduced 20% via cloud modernization.

DISH Network | *Staff Software Engineer*

2010 – 2017 | Denver, CO

- Designed payment platforms processing \$500M+ annually with 40% reduction in manual intervention; built fraud detection systems reducing unauthorized transactions by 45%.
- Architected order processing systems handling 30K orders/day and \$8M in daily transactions; engineered self-service billing portal increasing adoption by 60% and reducing call-center costs by 35%.

Dell Technologies | *Software Development Engineer*

2007 – 2008 | Austin, TX

- Built IT systems for global Reverse Service Logistics; improved repair turnaround time by 20% through workflow automation and developed forecasting models for supply-chain optimization.

EDUCATION

M.S. Computer Science — Northern Illinois University | GPA: 4.0/4.0

B.E. Electrical & Electronics Engineering — Osmania University | GPA: 3.96/4.0

CERTIFICATIONS

AWS Certified Solutions Architect – Professional (current)
